# ALU-REX: LASTING PERFORMANCE

## LEAVES & DEBRIS

Rain gutters get clogged by leaves and debris.

The T-Rex® and Gutter Clean System® keeps leaves from clogging rain gutters and let water flow efficiently and quickly, preventing water infiltration to the roof and foundations. Debris is blown away by the wind.

## SNOW & ICE

Ice and snow accumulation damages and deforms rain gutters.

With Alu-Rex products, the eavestrough will not suffer the consequences of freeze/thaw activity, thereby extending the life span of the rain gutter.

## UNRELIABLE PRODUCTS

Some unreliable gutter protection brands large holes that allow debris to get through.

Alu-Rex products have been installed on millions of homes and are guaranteed against clogging. They offer the perfect compromise between efficient drainage and debris filtration.

## THE ASSURANCE OF AN EFFICIENT PRODUCT

**Alu-Rex products can handle even more water than a storm downpour offering peace of mind for optimal rain water drainage.**

**Debris stays on top and a light wind blows it away. Even if there are leaves on the rain gutter protection, water flows efficiently.**

**Independent tests results showing the performance of Alu-Rex products [www.alu-rex.com/tests](http://www.alu-rex.com/tests)**
